

Downloading and installing the application on macOS. Authorization and Registration in Rendall

## **Downloading Rendall from official website**

Go to the website https://rendall.im and then click «Download».

On the page that appears, select your OS and then click on it.

## **Installing Rendall on macOS**

1. Open ".dmg" file you downloaded from the website.

2. Click on "Finder" icon with the right-click or tap on it with two fingers. Select "New Finder Window".

New Finder Window	
New Smart Folder	
Find	
Go to Folder	
Connect to Server	

3. In the new window click on the "Applications" tab and drag the Rendall icon from the first folder to "Applications". After that Rendall will be installed on your Mac.

4. Create shortcut by dragging Rendall icon from the "Applications" tab to Dock. Then launch Rendall.

5. After launching Rendall for the first time, you'll see system alert telling you that "Rendall cannot be opened because the developer cannot be verified". Click "Cancel" and go to "System preferences", that you can find by clicking on "Apple" icon on the top left corner of the screen.

É	Finder	File	Edit	View	Go	Window	Help

"Rendall" was blo identified develo	ocked from use because i per.	t is not from an		Open Anyway	
ck the lock to mak	e changes			Advanced	

7. After that you'll see another system alert. Click "Open" and Rendall will be launched on your Mac.

**Note:** The actions that allow Rendall to launch on your Mac need to be done just once after installation. After that the application will always launch without the system alerts.

## Authorization and registration in Rendall

Once you have launched Rendall, you can enter with the login / password which you should receive from the creator of your team.

If you already have a login / password, enter it in the appropriate fields and click "Enter".
